# Later from Salmon River and Walla Walla.

Later from Salmon River and Walla Walla.

By the arrival of the overland mail from Portland on Saunday evening, we have news from Salmon River to January 28th, and Walla Walla to February 25th The disagreeable part of the news is the death of thinteen men, killed by the Snake Indians, in the neighborhood of John Day's River. On the 22-1 of November had, a party of 32 men; le'it Tigh valley to go to the newly discovered gold mines on the head of John Day's River, about 180 miles distant from the sacting point, in a southeasterly direction. After a tedious trip of nearly six weeks the party arrived at their destination. Finding the weather too cold to do anything at mining, after staying a few days to build winter quarters, fourteen of the party at different times storted back to the Dalles with the animals. On the 9th of Feb., one of the two last men that had left the camp returned with the news that his contrade had been shot and ins antly killed by a party of Snake Indians. This occurred on the 6th of February, about 60 miles from the camp at the mines. The remaining party then cached their golds and came down to the Dailes on foot. None of the other parties who left with the animals having been heard of, there is no doubt they have either been who left with the animals having been heard of, there is no doubt they have either been murdered by the Indians or perished in the

Accounts from Salmon civer state that 1500 men were in the mines on the 28th of January; that the snow was 4 1 2 feet deep; too cold to do anything at mining and that provisions enough for a limited season were to be had. A large amount of gold is in the hands of miners at Salmon river, but it is thought that the season for mining will not open before the first of June. At Walla Walla, the anow-was eighteen inches deep Walls, the snow was eighteen incoes deep on the 25th of February, and much stock had died for waht of food. Pr. visions were plenty in the town, and a soupe-house had been provided for the destitute. From all parts of the country, east of the Casca les, stock are said to be dying off in great number. lers - Some persons having as many as 500 head of cattle a few months ago, are now left with not more than 40 or 50, and scarcely n hope that even they will survive the cold weather.

In the Klikatat valley many cattle were dying, apparently from some epidemic, as they were said to be in good condition.— Judging from the news we have, it looks like madness to start for Salmon river for at least a month or six weeks longer. At Port-land there are already about 3000 men wait-At Port. land there are already about 3000 men waiting for an opportunity to go; and there can be no doubt that there are more people enroute for Sa mon over than can be accommodated with provisions and transportation. The result will be that many will get impatient and try to force their way through and starve to death on the road. The navigation has been opened—after a fashion, to the Dalles, but it is a creat deal too soon to start to Salmon river—Overland Press.

GREAT RISE IN THE PRICE OF COTTON Goods.—The Southerners will rejoice in the fact that the war, by cutting off the raw cotton supply from the Southern States, has carried up every variety of cotton goods to a range of prices known only to the former generation. The rise was steady and rapid times on generation. The rise was steady and rapid for ten or twelve weeks, averaging about half per cent, per yard a week, and prices are still advancing. Heavy sheetings at the BRAFTS on San Francisco, California. manufactories are now firm at 16 cents, per yird; a year sugo they were but 7½ cents. Denims are 15½ cents, which a year ugo were 9½ cents. Aften's, Daniels', American and Sprague prints are now sold at fourteen cents, which a year since were sold at 7½ to 8 cents. Crebregoes and Merrimacs are firm at 14½ to 15 cents. The durable styles of prints are last disappearing from the market. If we are to the balked of cutton for several years, (which may Heaven forbid and Gen McCellan prevent) and are compelled to wait for flax manufacture to be resuscitated, the Springfield (Ma\*) Republican says, the material for this garments will tise to such a point as to illustrate the such as point as the such as point as the such as point as to illustrate the such as point as the such as a such as point as the s that 'ere gal was raise! where cotton is scuree!'

THE GRAYES IN THE STREET.—The miners of an earlier period selected a spot now in front of the Folsom Theates, for the burial of their dead, and their successors have not into a street and selected a part of which the selected in the selected in the selected in the selected as pot now in front of the Folsom Theates, for the burial of their dead, and their successors have not into a street and selected as part of which the selected in the selected in the selected in the selected as pot now in the selected a

grinning relics of death; and here many have sported who may not leave such good friends to mourn them and care for their graves as Prebasco left, and whose little graves as Probasco lett, and whose little white marble grave stone, projecting above the mud of the street, gives this account: "Henry Probasco, of Lebacon. Ohio. died of cholera, Oct. 29 1850."—San Fran. Mirror.

cholera, Oct. 29 1850."—San Fran. Mirror.

The Gold Fever Raging—Within 48 hours, says the San Francisco Call, nearly althousand eager adventurers have left our city for the New El Dorado [Salmon River], with what success let the history of Fraser River and kindred excitements tell. The Brother Jonathan on Monday, took out six or seven hundred, and the Sunny South had a full load yesterday. Other vessels are already ndvertised, and the history of another gold bubble is soon to be written with all its details of disappointment, suffering, and in many instances despair and death. Extra vessels are about to be put on the route to accommodate the increased travel.

Costiveness—Whether habitual or temporary, is productive of the greatest evil to the hum in astem. In fact, it is the procursor or concomitant of a majority of the diseases to which man is heir. It arises from many causes, but usually from a torpid or inactive condition of the liver, and hence remedies acting on that organ have been found best adapted for its cure. O these remedies JAYNE'S SANATIVE PILLS have no superior, and thousands who have been restored to health by thor use willingly testly to the fact.

Sold by CURTIS & MOORE and LANGLEY BROS., Victoria.

COUGHS, PRONCHIAL COMPLAINTS, &c.—Rev. D. P. Livermore, Editor of the Chicago New Covenant, says of Brown's Bronchial Troches: "We have frequently had occasion to test the efficacy of Brown's Bronchiai Truches," and tave invariably found them to answer the purpose I which they are recommended. From our own personal experience and observation, we know them to be a superior remedy for colds, coughs, and brenchial complaints."

Note.—We publish the above statement as reading matter, because we have confidence in the Troches, having tri dthem frequently, and always with success.—Cincinnati Christian Herald.

Holloway's Ointment and Pills.—Pain all Diseases — There are some disorders distressing to both body and mind which false d licacy conceals from the knowledge of the most infinite feriends. Persons suffer from piles and similar complains, when they might use the above remedies with instant relief, and effect their own cure without the annoyance of explaining their ailment to my one. The absence of all irritating and miner I poisons permits the free use of Holloways' preparations with the certainty of obtaining ease for the present immunity for the future. Thous ands af most pain (u)-cases have been reported where the sufferer were silently chirch by these means, whose gratitude to the discoverer of such southing emedies is as unbounded as deserved. ### Landing Permits.

Quite a different rule has obtained lately in the Harbormaster's office respecting landing permits, from what was formerly in habit of getting a dozen small invoices by vogue. Formerly a dozen invoices might be lumped together and one permit suffice for by lumping them together by special arrar ge-Now, no matter how small or how large the invoice, there must be a permit for each invoice before the goods can be landed. As the new and stricter interpretation of the "Harbor Dues Act, 1850," has caused more or less inquiry into the matter, we quote the following section and schedule of the law for general information :

for general information:

Section V. No goods other than the produce of the Colony and passenger's luggage, shall be landed from any vessel in Victoria or Esquinalt, antil the same and the value thereof shall have been first reported to the Harvormaster of Victoria and the permit to land the same shall have been received from the said Harbor Master, or his Deputy or Deputies, and there shall be charged and paid for such Landing Permit the sum mentioned in Schedule D to this Act annexed.

SCHEDILE D. SCHEDULE D.

tion of the "Harbor Dues Act 1860," will materially increase the revenue of the Harbor-Master's Department. But it must strike one as exceedingly curious that the discovery was not made at an earlier period than it has been. In England and elsewhere, as soon as a vote passes in Parliament altering the revenue, either raising or lowering it, and more particularly when it is raised, it is customary to collect the duties at the altered rate. But it appears that this long established custom has not been attended by our inexperienced authorities, and consequently the revenue has suffered to a very considerable amount. The exact amount we cannot state precisely-certainly \$600 to \$1000 has been lost; but by whose fault in particular we cannot state; yet it is not improbable that it lies between the Provincial Secretary and the Attorney General. The latter introduced the law, and the former was first apprised when the Governor's as sent was given to it. So if the rule be applied that the altered rate of permits should be enforced as soon as it passes the Assembly, or as soon as the bill receives the Governor's assent, it is difficult for either of those officials to escape the responsibility of losing \$600 or \$1000 of public money, which if added to sundry other losses in 1861, would sum up a rather large amount. The former Harbor-Master ignorant of the law revising the permit system, was not held responsible for the consequent deficiency in the revenue, Ignorantia non excusat was held in his case to be a maxim of no value. So then the deficiency is still unsettled; and as the Assembly meets to-day, it will be worth while to notice whether any inquiry will be made into the matter, or whether the defin quant authorities will be asked to make good what has been lost through their inexperience or neglect. We cannot well escape the conclusion that the colony cann it suffer; for if it pays its servants to do its business, and they fail to do it through any cause under their control, as a matter of course they are the responsible parties, and should

be held to make good the deficiency. Importers may see for the nselves that under Section 5, Schedule D, "Harbour Dues, Act, 1860," a landing permit has to be obtained for every invoice before goods can be landed. No one can have any reasonable objection to paying a small tax in the shape of permit dues. Money must be had from some quarter to me t the expenses of Government; and in distributing a portion of the public burdens over all goods landed in the Colony may lighten in some degree the taxes on some other sources of revenue. Where objection arises to the invoice permit system is from two causes: One for charging 4s. 2d. on an invoice under £100, and only 16s. 8d on an invoice of £1,000 or upwards. There is an injustice done to the smaller importer. The large importer im- PEARL BARLEY-Of superior quality, in ports or lands his goods cheapest. For, if the importer of goods worth £100 pays 4s. 2d, the importer of goods worth £1000 ought to pay for his permit £2 1s. 81. Instead of that he only pays 16 . \$4. Were the permit dues levied according to the value of the invoice the smaller importer would have no cause to complain. As it is they are justified; and particularly so when it is recollected that four steamers a month causes more small orders to be sent below than would otherwise be the case were Sau Francisco more distant or communication less frequent. It may be arged that the consumer really pays the tax, and not the small importer, and consequently the object of the law is attained—the collection of a revenue. It may also be argued that lower permit dues are imposed on large invoices than on small ones in order to promote the centralization of merchandise here. Whatever merit there may be in the policy of favoring the large importer, it is clear enough SPARKLING HOCK AND MOSELLE. to us that the marked difference between the permit dues on large and small invoices will be productive of loss to the revenue, And there is the second objection. A small -importer-one who imports eften-will take the necessary steps to have his speak orders

all put into one invoice at San Francisco, A dozen or more may-perhaps have beenunited together. Whether a "salt water' invoice or not, or whether by special arrangement, it matters not a whit, the lumped invoice is entered and a permit obtained, and so the revenue loses through the defects of the revenue law, or the policy that favors large importers and imposes heavier burdens on smaller ones. Why, any importer of nick-nacks who has hitherto been in the steamer or sailing vessels four times a month. ment where purchased, would pay only \$12 per month instead of \$48, and thus he would save nearly his rent or \$36 every month.

SMALL Pox .- For three or four days past rumors have prevailed in town to the effect that the small pox had broken out, and that several cases of the worst type were already under treatment. We have made diligent inquiry, and yesterday learned sufficient to justify us in announcing that one case of varioloid really exists here. The patient came from San Francisco on the last steamer, and was attacked by the loathsome disease either just before reaching this port or soon after landing. The case is not considered a dangerous one by the attending physicians, although a consultation was held yesterday to determine its character. While on this small pox is very prevalent at San Francisco, and that the public prints, from some unknown cause, forbear to mention the fact; nor information reaches us from three different go." As our city is now in almost weekly communication with the Bay City, the danger of contagion from that quarter is necessarily very great, and we therefore hope that we shall not be regarded as alarmists when we advise our citizens-and more especially those who design proceeding to the mines, where proper medical treatment and good nursing are not to be obtained at any price -to proceed at once to a physician and undergo vaccination. The cost is but a trifle when compared with the perfect immunity from the loathsome disease which those who may take this precaution will enjoy. The varioloid patient alluded to above is roomed, we understand, in a thickly populated neighborhood, and in a house where several other persons reside. He is well looked after and cared for; but from sanitary motives we yesterday. would recommend his immediate removal, if possible, to comfortable quarters in the suburbs of the town

Was IT THE " PRUTH."-From the Port speech. Townsend Northwest we learn that a man arrived at that place from Victoria, on the brig Francisco, and reported that on Friday, the 14th inst, while on his way up in a canoe with some Indians, he saw a back dismasted a short distance from Neah Bay. She appeared to have a deck load of lumber and was waterlogged. The stumps of the main and mizzen masts were standing above the deck load, and a jury-mast had been rigged forward, by a sail on which she was apparently making her way into Neah Bay, with a fair wind. This was in the morning. At 4 or 5 o'clock in the afternoon, the wind hauled to the westward, which would blow her up the Straits unless she got her anchor down in that harbor. The wreck was about six miles distant, towards the American side, and the sea so heavy he did not consider it safe to go over to their assistance. The North west thinks that the vessel seen must have been the bark Pruth, that left Sooke for China some ten days ago. It is possible, however, that the informant may have mistaken the locality, and saw the wreck of the Anna Barnard, which lies about 15 miles outside of San Juan narbor.

GIVING SQUAWS LIQUOR. - Yesterday morning, at 2 o'clock, two respectable looking men, named Simon Wyatt and Joseph Molen, were arrested by officer Brew, at a ing men, named Simon Wyatt and Joseph house near the Johnson street ravine, on a and charge of giving three squaws liquor. On the person of Molen was found the sum of \$300. Mr. Pearkes appeared for the defence to the Police Court, and said that he could prove that the officer who made the arrest had done so through the promptings of the green-eyed monster, one of the feminines having bestowed her favors on Molun instead of himself, and that after locking the prisoners up he had gone back to the house and remained there until daylight. A witness was called to the stand who proved that he saw Molun pass a bottle containing liquor to the squaws. The charge against Wyatt was dismissed, and he was placed in the witness-box, but declared that he knew nothing of the liquor-saw none, smelled none, tasted none. Mr. Pearkes offered to ent of the San Francisco Bulletin says bring one of the women to prove the animus which actuated the officer in making in favor of the proposition for a joint survey the arrest, but the magistrate declined to of the United States and Russia, of the rounds. receive Indian testimony, and fined Molun \$50, which he paid.

DEPARTURE OF THE "OTTER." - The steamer Otter left at 8 o'clock yesterday morning for New Westminster. She had about 300 tens of freight and about 75 passengers. Enough freight to fill her another trip was left in the warehouse, and will be sent up on Friday. Many of the passengers were Carlbooites, who intend pushing their way northward to their claims as rapidly as the weather and the state of the roads will admit. The season so far is nearly six weeks behind that of last year.

THE FIRST CANOR -The first cance for Cariboo left this place on Monday last, manned by six men and containing a supply of provisions and mining utensils. The goods will be boated up the Fraser to the mouth of Cañon Creek, which empties into the Fraser at a point between Quesnelle and Cottonwood Rivers. The parties are miners, and among other articles have a large whipsaw, to be used in getting out lumber for sluices, &c.

Ash-Throwers. - Sixteen citizens appeared before Mr. Pemberton yesterday in answer to summonses charging them with throwing ashes into the streets. Among of "Dixie:" those summoned were jewellers, physicians, barkeepers, druggists, grocers and general traders, and "gentlemen of leisure." of the cases were postponed, two dismissed, one fined costs of court (2s.), and the remainder muleted in the sum of 10s, each. Most of the defendants claimed to have employed Mr. John Butts to remove the ashes from in front of their premises, but he seems to have failed to perform his duty. Some paid their money with an illuminating smile on their countenances which seemed to betoken an innate feeling of satisfaction at the opportunity afforded them of contributing a trifle towards the Colonial revenue; subject it may not be improper if we state others again, appeared to think themselves that from private sources we learn that the hardly used, and forked over with a facial expression akin to that exhibited by a person who has sustained a long seige of toothache. One or two ventured a "goak" at the should we allude to it, were it not that the expense of the magistrate; but it was "no The remorseless sword descended and sources, any one of which we deem reliable. cut the purse-strings of the delinquents almost as soon as they had time to plead.

"OFF FOR CARIBOO."-A drunk and disorderly cove, found running loose around Yates street, on Monday night, was arraigned in the Police Court yesterday. He pleaded that this was his last drunk in town flood ranges from two to eight feet in depth Yates street, on Monday night, was atraignas he was off for Cariboo on the very next steamer. The magistrate mercifully let him run on payment of a 5s.-fine.

RETURNED .- On Monday night, at nine o'clock, the steamer Henrietta left City Wharf for New Westminster, but on proceeding outside and encountering a heavy gale, it was not deemed advisable to attempt the passage, so she was put about and returned to the Hudson Bay Company's wharf, where she remained during the blow

House or Assembly .- This body will meet at 2 o'clock to-day in the Supreme Court Room, James' Bay. Governor Douglas will open the House with the customary

THE "ENTERPRISE." -- Arrived from the Sound at half-past eight o'clock, a. m., yesterday morning, and will leave on the return trip at daylight this morning. She brought 12 passengers and \$1300 worth of freight.

THE "SIERRA NEVADA"-Probably left San Francisco last Monday and will be due here on Monday or Tuesday of next week. She will come by way of Portland.

A man named William Johnson was trested last night on a charge of selling whisky to Indians.

Mr. McCrea will sell on Union Wharf this morning, spars, chains, sails, rigging, and two compasses.

Mr. Backus will continue the sale at the Hudson Bay Company's store, at 10 the C o'clock this morning.

A NATIONAL TAX ON AMERICAN DOMESTIC MANUFACTURES.—The amount to be derived from a six per cent, tax on domestic manufactures it is difficult to estimate, out manufactures it is difficult to estimate, out it is not likely to be less than \$70,000,000 per annum. The most recent official statis-tics we have on the subject were reported to Congress in 1850, in Executive Document No. 39, second section of Thirty-fifth Conand exports, since the year 1850 have more than doubled, and it is therefore reasonable to assume that a large increase consumption and decreased the use of imported articles. In 1850 the population of the free States was 14,434,922, which gave the consumption of domestic manufactures in that year as \$80 per head; and if we take the same basis now and population in the free States at twenty millions, this would make the annual production of domestic manufactures sixteen hundred millions, instead of a thousand millions as in 1850, giving a tax revenue of \$96,000,000. This tax would be eminently popular in the Western States and in all the agricultural districts.—Am. paper. districts .- Am. paper.

WHAT SENATOR LATHAM IS DOING FOR CALIFORNIA .- The Washington correspond-

Mr. Latham has prepared an elaborate report (on behalf of the Military Committee) for the proposed line of magnetic telegraph from California via Oregon, British Columbia, Behring's Straits to the mouth of the Amoor River. P. McD. Collins of Califor-nia, who has exhibited so much public spirited enterprise in urging this great scheme upon the two Governments, is still here pushing it before Congress. He de-

serves no little credit for his perseverance.
Mr. Latham has also reported from the
Naval Committee, the bill authorizing a
subsidy of \$300 000 for the establishment of a line of steamers between San Francisco and China. The Committee favor the pro-ject, but hesitate to recommend the expenditore in the present condition of public affairs. He accordingly reports the bill back without any recommendation. Mr. back without any recommendation. Mr. Latham, however, is confident that he can so demonstrate to the Senate the economy of the measure as a means of establishing a Naval Police on the Pacific, that it will pass the bill. I confess that I am not so sanguine of any legislation at present for California which involves expenditure of money.

U S. PUBLIC DEST .- The public debt of the United States, on the 15th of January, 1862, was \$369,000,000. On the lat of July, 1861, it was \$90,867,828. The debt has grown during the last six and a half months at the rate of \$1,264,300 a days. An Incident.—A few nights ago, says the Piacerville Republican, a young man while proceeding home with a lighted lantern, amused himself by singing to the tune of the birs.

"In eighteen hundred and sixty-three, We'll hang Abe Lincoln on a tree, Away down South in Dixie!"

Away down South in Dixie!"

Suddenly slipping, he fell into the mud, and extinguished his candle. Rising he appealed for a light to a stranger who had been waiking behind, also with a lantern. He received the following reply, uttered in a rich Irish brogue:—"Divil a bit ov a light! jist for singing ov that dirthy song! An fur twopins, I'd giv yez a clout in the but ov the lug, and sind ye sprawlin' on the broad ov yer back agin!" The astonished and discomfited singer, (who by the way, is not a secesh), very discreetly increased the ov yer back agin?" The astonished and discomflied singer, (who by the way, is not a secesh), very discreetly increased the distance between himself and the strong right arm of the right feeling Irishman, with the conviction that he had been properly punished.

EFFECT OF THE INUNDATION UPON THE SOIL.—Upon taking a calm and intelligent survey of the field covered by the inundation, says the San Francisco Herald and Mirror, it appears that while portions of the farming lands of the State have been subjected to lands of the State have been subjected to serious damage, only a small section has been ruined for the purposes of agriculture, and a large proportion, especially in the southerly part of the State, where our fat cattle come from, have been actually benefitted by the soaking they received. The rural industry of the State can never meet

More persons die suddenly from diseases of the Heart-More persons die suddenly from diseases of the heart than the unlearned suppose; in such com-plaints, the bowels should always be kept well open, as also where there is a tendency of blood to the head. These celebrated Fills purify the blood in an extraordinary manner, and should be taken in copi-ous doses, when such symptoms occur, taking care not to overload the stomach; by this means all dan-ger is quickly averted.

WHOLESALE AND RETAIL DEALERS

Headaches, Bile. Loss of Appetite, and Lowness of Spiri's.

These Pills require no interruption of business or plesaure; they act mildly on the bowels, strengthen the stomach, and promote a healthy action of the liver, whereby they purity the blood, cleanse the skin, brace the nerves, and invigorate the while system. They effect a truly wonderful change in deblitated constitutions, as they create a healthy appetite, correct indigestion, remove bite, gliddness, head-aches, and palpitation of the heart.

Weakness and Debbitty. -IN-DRY GOODS,

CLOTHING, Boots and Shoes, Blankets, when, and palpitation of the heart.

Weakness and Debility.

In cases of debility, languor, and nervousness generated by excess of any kind, whether mentat or physical, the effect of these Fills is in the highest degree bracing, renovating and restorative. They drive from the system the morbid came of disease; restablish the digestion, regulate all the secretions, brace the nervous system, raise the patient's spirits, and bring back the frame to its pristine health and vigor They increase the appetite, while they seeme oeried ligestion to all ordinary tood, and release the invalid from restraint in diet.

Children's Complaints.

It is not generally known, but such is the tact, that children require medicine oftener than their parents. Three-tournts of the children die before they attain the age of eight years. Let mothers, then, be wise, and give to their children small doses of these invaluable Pills once or twice every week, in such quantity as may act gently upon the system twice in the twenty-four nours. For infants, a lill may be crushed and given as a powder in a little water. The grosshumors that are constantly floating about in the blood of children, the forerunters of so many complaints, will thus be expelled, and the lives of thou sands saved and preserved to their parents. Baltic Stockings. tor winter wear. Orders sent through Express for Shirts, by sending the size of the neck. I will guar antee to fit. Orders filled for all parts of
